Meghdoot Software
Introduction

Technology has always dictated and lead the change in the way things are done or need to be done. The Department of Posts is not an exception.

The journey of CEPT began when "Meghdoot" was born at the Software Development Centre of PTC, Mysore. Today Meghdoot software is one of the most precious technology tool offered by CEPT to the Post Offices across the country.

Meghdoot is perhaps an unparallel and un-precedented example of successful IT intervention and Technology Management by a Government Department for improving its services.

The success of this technology endeavor was purely based on the fact that Meghdoot was our own product developed by our own personnel.

This facilitated acceptance and internalization of the software by the entire Postal operation system easily. Hence, what began as a small initiative way back in 1996-98 necessitated a need to have a full fledged Center for Excellence in Postal Technology very aptly located and inaugurated in 2009 in the same campus where Meghdoot was born.

SPEED POST:- Speed Post option, has the selections as shown in the following picture.

INLAND SPEED POST:- To Open the Screen

- Through keyboard: Press "CTRL" + S Or Press "ALT" key + I, a pull down menu appears. Then press S. A sub menu appears in which the option "Speed Post" is available. Then press S again.
- Through Mouse: Click on the option Inland mails on the menu bar. A pull down menu appears. Select the option "Speed Post" in the pull down menu. A sub menu appears. Then move to the option "Speed Post" in the sub menu and click.
- You will get the following screen for booking the article.

To Book the Speed Post article:

- Article number appears in the box is Barcode number. (EE0000123831N) appear automatically on Scan the Barcode, if computer is connected to a Barcode Scanner, otherwise enter the barcode number manually.
- In the box " Prepaid mode" Select "PS" mode if postage stamps already affixed on the article by the customer, if postage paid through Franking Machine select FM, SS in case of service stamps. If no postage stamps are affixed on the article select blank space mode, , then press ENTER key to go to next field.
- In the Box "Weight", enter the weight of the article in grams. Tariff will be displayed on the right indicates the amount to be collected from the customer. Weight should not be more than 20 Kgs.

MAIN MENU OF COUNTER OPERATIONS:

The picture shows the main menu.

- From the main menu you may select the item with the click of mouse or by pressing ALT and Underlined letter in the menu items. Eg. You may press ALT and letter I for selecting Inland Menu Item or click the mouse on Inland Mail Option. A pull down menu appears.
- In the pull down menu also there are underlined letters which you can select through keyboard or mouse. E.g. If you want to select Letters option under Inland Mail press letter L (which is underlined). You will get a submenu. To select Registered Letter item press L (which is underlined).
- You may also click on the items available on the desktop or use CLRL + specified Alphabet on the Desktop. Eg. Press CTRL + L for registered Letter or click on RL on desktop. List of the Shortcut keys for counter operations is given at the beginning of the book.
INLAND MAILS:

The following picture displays the options available under the Inland Mails.

LETTERS:

Letters option, has the selections as shown in the following picture.

1987

1989

1990

1992

1999

Meghdoot Software

Meghdoot software is designed and maintained by Centre for Excellence in Postal Technology, PTC, Mysore. It is designed to work in Microsoft Windows network with SQL Server as the RDBMS. The first version of Meghdoot was released in the year 1998 with the roll out of Meghdoot Point of Sale and later on all the other modules were added.

INLAND REGISTERED LETTER:

To Open the screen

- Through keyboard: Press "CTRL" key + L
- Through mouse: Click on option "Inland Mails" on the Menu Bar and highlight the option "Letters"(see Picture 5) on the pull down menu and select "Registered Letter" on the sub menu and click .
- Now you get the booking screen.

To Book the letter

- In the box " Prepaid mode" Select "PS" mode if Postage stamps already affixed on the article by the customer, if postage paid through Franking Machine select FM, SS in case of service stamps. If no postage stamps are affixed on the article select blank space mode, , then press ENTER key to go to next field.
- If acknowledgement is attached then select AD by clicking mouse in check box or pressing space bar in key board
- In the box "Weight", enter the weight of the article (in grams) if your computer is not connected to weighing scale. Amount to be collected is displayed in the Tariff calculation box.
- If acknowledgement is attached to the article, then in the box for acknowledgement(AD) put a tick by using the spacebar or mouse.
- In the box "Number of Articles" enter the number of articles to be booked (in case of bulk booking). For example, if ten articles are to be accepted at a time, the screen will replicate ten times. If only one article is to be booked press ENTER key to go to next field.
- In the "To Address" portion enter the name and address of the addressee in the boxes provided.
- Type first few letters of the Post Office name in the required text box and press F8 key. Select the P.O. from the drop down list by using up and down arrow keys and press ENTER. PIN code will be displayed in field.
- click "Print" button or press ENTER key to print the receipt.

SPEED POST:- Speed Post option, has the selections as shown in the following picture.

INLAND SPEED POST:- To Open the Screen

- Through keyboard: Press "CTRL" + S Or Press "ALT" key + I, a pull down menu appears. Then press S. A sub menu appears in which the option "Speed Post" is available. Then press S again.
- Through Mouse: Click on the option Inland mails on the menu bar. A pull down menu appears. Select the option "Speed Post" in the pull down menu. A sub menu appears. Then move to the option "Speed Post" in the sub menu and click.
- You will get the following screen for booking the article.

To Book the Speed Post article:

- Article number appears in the box is Barcode number. (EE000012383IN) appear automatically on Scan the Barcode, if computer is connected to a Barcode Scanner, otherwise enter the barcode number manually.
- In the box " Prepaid mode" Select "PS" mode if postage stamps already affixed on the article by the customer, if postage paid through Franking Machine select FM, SS in case of service stamps. If no postage stamps are affixed on the article select blank space mode, , then press ENTER key to go to next field.
- In the Box "Weight", enter the weight of the article in grams. Tariff will be displayed on the right indicates the amount to be collected from the customer. Weight should not be more than 20 Kgs.
