

THE STUDY OF 5P FAMILY PLANNING STAMP — 2

While in New Delhi for India-80, we had the pleasure to meet Shri S. P. Bansal of Ferozabad, an ardent student of Indian philately. We did take time off to have a hurried chat with him. Shri Bansal is currently studying the 5P Family Planning Stamp and has found a number of flaws and varieties, some of which were reported in the January/February issue of the PJI. In this issue, we illust-

rate two further flaws which have been kind enough to bring to our notice. Thank you Shri Bansal.

- (a) Frame line broken near 5 — verticle line Position R1/7.
- (b) The upper bar of '5' short in length position R3/7.
- (c) Two white dots near 'I' of INDIA. Position R1/2.

The 5P Family Planning Stamp referred to in Bansal's notes.
